

Announcement @May.31

- ▶ Programming Assignment 6
 - ▶ Due: June. 14, 11:59 pm
- ▶ Homework 6
 - ▶ Due: June. 12, 11:59 pm

Project Presentation and Submission

▶ Project presentation

- ▶ Time: In class, June. 7 & 9 (Tue & Thu)
- ▶ Each group has 8 minutes for presentation
- ▶ Schedule:
 - ▶ June 7: group 1-9
 - ▶ June 9: group 10-17

▶ Report & Code

- ▶ Due: 11:59pm, June. 9 (Thu)
- ▶ Submission link at BB -> Project -> Project Submission
- ▶ Format: PDF, academic paper, no page requirement (Report); Code
- ▶ Each group only needs to submit one report and code

Final Exam

- ▶ Time
 - ▶ 8:00-9:30am, June. 16 (Thu.)
- ▶ Location
 - ▶ Online: Blackboard + Tencent Meeting
- ▶ Format
 - ▶ Open-book (纸质材料)
 - ▶ 15 multiple-choices, 2 problems
- ▶ Grade
 - ▶ 25% of the total grade
- ▶ F2018 final exam paper is available at:
 - ▶ Blackboard menu → Previous Exams → Fall 2018 Final Exam

Final Review

Disclaimer

- ▶ Topics covered in this review may not appear in the exam.
- ▶ Topics not covered in this review may appear in the exam.

Probabilistic temporal models

- ▶ Markov models
 - ▶ Markov assumption, Transition model
- ▶ Hidden Markov models
 - ▶ Transition model (states) + emission model (evidence)
 - ▶ Filtering: $P(X_t | e_{1:t})$
 - ▶ Forward algorithm
 - ▶ Most likely explanation: $\operatorname{argmax}_{x_{1:t}} P(x_{1:t} | e_{1:t})$
 - ▶ Viterbi algorithm
- ▶ Dynamic Bayes networks
- ▶ Approximate inference by particle filtering
 - ▶ Propagate forward → Weight → Resample

Markov Decision Processes

- ▶ Markov Decision Process
 - ▶ States S , Actions A , Transitions $P(s'|s,a)$, Rewards $R(s,a,s')$
- ▶ Quantities:
 - ▶ Policy, Utility, Values, Q-Values
- ▶ Solve MDP
 - ▶ Bellman equation
 - ▶ Value iteration
 - ▶ Policy iteration
 - ▶ Policy evaluation + Policy improvement

Reinforcement Learning

- ▶ Reinforcement learning
 - ▶ MDP without knowing T and R
 - ▶ Offline planning vs. online learning
- ▶ Model-based learning
- ▶ Model-free learning
 - ▶ Policy evaluation: Temporal Difference Learning
 - ▶ Exponential moving average
 - ▶ Computing q -values/policy: Q-Learning
- ▶ Exploration vs. Exploitation
 - ▶ Random exploration, exploration function
- ▶ Approximate Q-Learning
 - ▶ Feature-based representation of states

Supervised machine learning

- ▶ To learn an unknown target function f from labeled examples
- ▶ Classification (f with discrete output value)
 - ▶ Naïve Bayes
 - ▶ All attributes are independent given class
 - ▶ Generalization and overfitting, smoothing
 - ▶ Perceptron (linear classifier), neural networks
- ▶ Regression (f with continuous output value)
 - ▶ Linear regression, minimizing summed squared error

Unsupervised machine learning

- ▶ K-means
 - ▶ Clustering
 - ▶ Iteration:
 - ▶ Assign each data instance to closest center
 - ▶ Assign each center to the average of its assigned data points
- ▶ Expectation-Maximization
 - ▶ Learning Mixture of Gaussians
 - ▶ Iteration:
 - ▶ E-step: Compute label distribution of each data point
 - ▶ M-step: Update each Gaussian based on its (proportionately) assigned points

Natural Language Parsing

- ▶ Context-free grammars
 - ▶ Terminals, Non-terminals, Start symbol, Production rules
 - ▶ Rules may have probabilities
 - ▶ Sentence generation/parsing
- ▶ Parsing: CYK
 - ▶ Convert to Chomsky normal form
 - ▶ Dynamic programming: bottom-up table filling
 - ▶ Probabilistic CYK: Bottom-up computation of probabilities of best partial parses
- ▶ Regular grammars
- ▶ Dependency parsing
 - ▶ Graph-based parsing
 - ▶ DG vs. CFG

Good luck in your final exam 😊

The Road Forward

- ▶ Related Courses

- ▶ Undergraduate

- ▶ SI151 Optimization and machine learning
 - ▶ CS150 Database and Data Mining
 - ▶ CS172 Computer vision I

- ▶ Graduate

- ▶ CS280 Deep Learning
 - ▶ CS282 Machine Learning
 - ▶ CS243 Introduction to Algorithmic Game Theory
 - ▶ CS272 Computer Vision II
 - ▶ CS283 Robotics
 - ▶ CS284 Simultaneous Localization and Mapping
 - ▶ SI232 Subspace Learning
 - ▶ SI252 Reinforcement Learning

- ▶ More to come...

The Road Forward

- ▶ Learning recent developments in AI from top conferences
 - ▶ AI: IJCAI, AAAI
 - ▶ Caution: not top in ML, NLP, CV
 - ▶ ML: NIPS, ICML, ICLR
 - ▶ NLP: ACL, EMNLP, NAACL
 - ▶ CV: CVPR, ICCV, ECCV
 - ▶ Other: KDD, AAMAS, UAI, SIGIR, ...
- ▶ A good (but not perfect) way to judge a publication venue
 - ▶ Google Scholar Metrics

That's all!
