Review: Types of WFFs

Tautology(重言式): a WFF whose truth value is T for all truth assignment

• $p \lor \neg p$ is a tautology

Contradiction(矛盾式): a WFF whose truth value is F for all truth assignment

• $p \land \neg p$ is a contradiction

Contingency(可能式): neither tautology nor contradiction

• $p \rightarrow \neg p$ is a contingency

Satisfiable(可满足的):a WFF is satisfiable if it is true for at least one truth assignment

Rule of Substitution: (代入规则) Let B be a formula obtained from a tautology

A by substituting a propositional variable in A with an arbitrary formula. Then B must be a tautology.

• $p \vee \neg p$ is a tautology: $(q \wedge r) \vee \neg (q \wedge r)$ is a tautology as well.

Review: Proving $A \equiv B$

EXAMPLE:
$$P o Q \equiv \neg Q o \neg P$$

 $P o Q \equiv \neg P \lor Q \equiv Q \lor \neg P \equiv \neg (\neg Q) \lor \neg P \equiv \neg Q \to \neg P$
EXAMPLE: $P o Q \equiv (\neg P \lor Q) \land (P \lor \neg Q)$
 $P o Q \equiv (P o Q) \land (Q o P) \equiv (\neg P \lor Q) \land (\neg Q \lor P)$
 $\equiv (\neg P \lor Q) \land (P \lor \neg Q)$
EXAMPLE: $P o (Q o R) \equiv (P \land Q) \to R$
 $P o (Q o R) \equiv \neg P \lor (\neg Q \lor R) \equiv (\neg P \lor \neg Q) \lor R \equiv \neg (P \land Q) \lor R$
 $\equiv (P \land Q) \to R$

Tautological Implications

DEFINITION: Let A and B be WFFs in propositional variables $p_1, ..., p_n$.

- A tautologically implies ($\mathbb{Z} = \mathbb{Z} = \mathbb{Z}$
 - Notation: $A \Rightarrow B$, called a **tautological implication**
 - $A^{-1}(\mathbf{T}) \subseteq B^{-1}(\mathbf{T}); B^{-1}(\mathbf{F}) \subseteq A^{-1}(\mathbf{F})$

THEOREM: $A \Rightarrow B$ iff $A \rightarrow B$ is a tautology.

• $A \Rightarrow B \text{ iff } A^{-1}(\mathbf{T}) \subseteq B^{-1}(\mathbf{T}) \text{ iff } A \to B \text{ is a tautology}$

THEOREM: $A \Rightarrow B$ iff $A \land \neg B$ is a contradiction.

• $A \rightarrow B \equiv \neg A \lor B \equiv \neg (A \land \neg B)$

Proving $A \Rightarrow B$: (1) $A^{-1}(T) \subseteq B^{-1}(T)$; (2) $B^{-1}(F) \subseteq A^{-1}(F)$;

(3) $A \rightarrow B$ is a tautology; (4) $A \land \neg B$ is a contradiction

Proving $A \Rightarrow B$

EXAMPLE: Show the tautological implication " $p \land (p \rightarrow q) \Rightarrow q$ ".

- Let $A = p \land (p \rightarrow q)$; B = q. Need to show that " $A \Rightarrow B$ "
- $A^{-1}(\mathbf{T}) = \{(\mathbf{T}, \mathbf{T})\}; B^{-1}(\mathbf{T}) = \{(\mathbf{T}, \mathbf{T}), (\mathbf{F}, \mathbf{T})\}; A^{-1}(\mathbf{T}) \subseteq B^{-1}(\mathbf{T}).$

p	q	$p \rightarrow q$	A	В
Т	Т	Т	Ī	<u>T</u>
Т	F	F	F	F
F	Т	Т	F	Т
F	F	Т	F	F

•
$$A \to B \equiv \neg (p \land (p \to q)) \lor q$$
 • $A \land \neg B \equiv (p \land (p \to q)) \land \neg q$
 $\equiv (\neg p \lor \neg (p \to q)) \lor q$ $\equiv (\neg q \land p) \land (p \to q)$
 $\equiv (\neg p \lor q) \lor \neg (p \to q)$ $\equiv \neg (p \to q) \land (p \to q)$
 $\equiv (p \to q) \lor \neg (p \to q)$ $\equiv \mathbf{F}$
 $\equiv \mathbf{T}$

Tautological Implications

Name	Tautological Implication	NO.
Conjunction(合取)	$(P) \land (Q) \Rightarrow P \land Q$	1
Simplification(化简)	$P \wedge Q \Rightarrow P$	2
Addition(附加)	$P \Rightarrow P \lor Q$	3
Modus ponens(假言推理)	$P \wedge (P \rightarrow Q) \Rightarrow Q$	4
Modus tollens(拒取)	$\neg Q \land (P \to Q) \Rightarrow \neg P$	5
Disjunctive syllogism(析取三段论)	$\neg P \land (P \lor Q) \Rightarrow Q$	6
Hypothetical syllogism(假言三段论)	$(P \to Q) \land (Q \to R) \Rightarrow (P \to R)$	7
Resolution (归结)	$(P \lor Q) \land (\neg P \lor R) \Rightarrow Q \lor R$	8

Proofs for 5 and 6

```
EXAMPLE: \neg Q \land (P \rightarrow Q) \Rightarrow \neg P
```

- $A = \neg Q \land (P \rightarrow Q), B = \neg P.$
- $A \to B \equiv \neg (\neg Q \land (P \to Q)) \lor \neg P$ $\equiv (Q \lor \neg (P \to Q)) \lor \neg P$ $\equiv (\neg P \lor Q) \lor \neg (P \to Q)$ $\equiv \mathbf{T}$

EXAMPLE: $\neg P \land (P \lor Q) \Rightarrow Q$

- $A = \neg P \land (P \lor Q), B = Q.$
- $A \to B \equiv \neg(\neg P \land (P \lor Q)) \lor Q$ $\equiv (P \lor \neg(P \lor Q)) \lor Q$ $\equiv (\neg(P \lor Q) \lor P) \lor Q$ $\equiv \neg(P \lor Q) \lor (P \lor Q)$ $\equiv \mathbf{T}$

Proofs for 7 and 8

```
EXAMPLE: (P \rightarrow Q) \land (Q \rightarrow R) \Rightarrow P \rightarrow R
       • A = (P \rightarrow Q) \land (Q \rightarrow R); B = (P \rightarrow R).
       • A \wedge \neg B \equiv (\neg P \vee Q) \wedge (\neg Q \vee R) \wedge (P \wedge \neg R)
                           \equiv ((\neg P \lor Q) \land P) \land ((\neg Q \lor R) \land \neg R)
                           \equiv ((\neg P \land P) \lor (Q \land P)) \land ((\neg Q \land \neg R) \lor (R \land \neg R))
                           \equiv (Q \land P) \land (\neg Q \land \neg R)
                           \equiv F
EXAMPLE: (P \lor Q) \land (\neg P \lor R) \Rightarrow Q \lor R
       • A = (P \vee Q) \wedge (\neg P \vee R); B = (Q \vee R).
            A \wedge \neg B \equiv (P \vee Q) \wedge (\neg P \vee R) \wedge (\neg Q \wedge \neg R)
                           \equiv ((P \lor Q) \land \neg Q) \land ((\neg P \lor R) \land \neg R)
                           \equiv (P \land \neg Q) \land (\neg P \land \neg R)
                           \equiv \mathbf{F}
```

More Examples

```
EXAMPLE: (P \leftrightarrow Q) \land (Q \leftrightarrow R) \Rightarrow (P \leftrightarrow R)
```

- $A = (P \leftrightarrow Q) \land (Q \leftrightarrow R); B = (P \leftrightarrow R).$
- $A = \mathbf{T} \text{ iff } (P \leftrightarrow Q) = \mathbf{T} \text{ and } (Q \leftrightarrow R) = \mathbf{T} \text{ iff } P = Q \text{ and } Q = R$
 - $A^{-1}(\mathbf{T}) = \{(\mathbf{T}, \mathbf{T}, \mathbf{T}), (\mathbf{F}, \mathbf{F}, \mathbf{F})\}$
- $B = \mathbf{T} \text{ iff } P = R$
 - $B^{-1}(\mathbf{T}) = \{ (\mathbf{T}, \mathbf{T}, \mathbf{T}), (\mathbf{T}, \mathbf{F}, \mathbf{T}), (\mathbf{F}, \mathbf{T}, \mathbf{F}), (\mathbf{F}, \mathbf{F}, \mathbf{F}) \}$
- $A^{-1}(\mathbf{T}) \subseteq B^{-1}(\mathbf{T})$

EXAMPLE: $(Q \rightarrow R) \Rightarrow ((P \lor Q) \rightarrow (P \lor R))$

- $A = Q \rightarrow R$; $B = ((P \lor Q) \rightarrow (P \lor R))$.
- $A = \mathbf{F} \text{ iff } (Q, R) = (\mathbf{T}, \mathbf{F})$
 - $A^{-1}(\mathbf{F}) = \{ (\mathbf{T}, \mathbf{T}, \mathbf{F}), (\mathbf{F}, \mathbf{T}, \mathbf{F}) \}$
- $B = \mathbf{F} \text{ iff } (P \vee Q, P \vee R) = (\mathbf{T}, \mathbf{F}) \text{ iff } (P, Q) \neq (\mathbf{F}, \mathbf{F}) \text{ and } (P, R) = (\mathbf{F}, \mathbf{F})$
 - $B^{-1}(\mathbf{F}) = \{ (\mathbf{F}, \mathbf{T}, \mathbf{F}) \}$
- $A^{-1}(\mathbf{F}) \supseteq B^{-1}(\mathbf{F})$

More Examples

```
EXAMPLE: (P \to R) \land (Q \to S) \land (P \lor Q) \Rightarrow R \lor S
        • A = (P \rightarrow R) \land (Q \rightarrow S) \land (P \lor Q); B = R \lor S
        • A \land \neg B \equiv (P \to R) \land (Q \to S) \land (P \lor Q) \land \neg (R \lor S)
                             \equiv (\neg P \lor R) \land (\neg Q \lor S) \land (P \lor Q) \land (\neg R \land \neg S)
                             \equiv ((\neg P \lor R) \land \neg R)) \land ((\neg Q \lor S) \land \neg S) \land (P \lor Q)
                             \equiv ((\neg P \land \neg R) \lor (R \land \neg R)) \land ((\neg Q \land \neg S) \lor (S \land \neg S)) \land (P \lor Q)
                             \equiv ((\neg P \land \neg R) \lor \mathbf{F}) \land ((\neg Q \land \neg S) \lor \mathbf{F}) \land (P \lor Q)
                             \equiv (\neg P \land \neg R) \land (\neg Q \land \neg S) \land (P \lor Q)
                             \equiv \neg R \land (\neg Q \land \neg S) \land (\neg P \land (P \lor Q))
                             \equiv \neg R \land (\neg Q \land \neg S) \land ((\neg P \land P) \lor (\neg P \land Q))
                             \equiv \neg R \land (\neg Q \land \neg S) \land (\mathbf{F} \lor (\neg P \land Q))
                             \equiv \neg R \land (\neg Q \land \neg S) \land (\neg P \land Q)
                             \equiv \neg R \land \neg S \land \neg P \land (\neg Q \land Q)
                             \equiv \neg R \land \neg S \land \neg P \land \mathbf{F}
                             = F
```

Argument

DEFINITION: An **argument** (论证) is a sequence of propositions

- Conclusion(结论): the final proposition
- **Premises**(假设): all the other propositions
- Valid(有效): the truth of premises implies that of the conclusion
- **Proof**(证明): a valid argument that establishes the truth of a conclusion

EXAMPLE: a valid argument, a proof

- If $\{2^{-n}\}$ is convergent, then $\{2^{-n}\}$ has a convergent subsequence.
- $\{2^{-n}\}$ is convergent.
- $\{2^{-n}\}$ has a convergent subsequence.

Argument Form

DEFINITION: An **argument form**(论证形式) is a sequence of formulas.

- **Valid**(有效): no matter which propositions are substituted for the propositional variables, the truth of conclusion follows from the truth of premises
 - Rules of inference(推理规则): valid argument forms (relatively simple)

EXAMPLE: a valid argument form and an invalid argument form

```
p 	o q p: \{(-1)^n\} is convergent. q: \{(-1)^n\} has a convergent subsequence. p 	o q: \{(-1)^n\} is convergent, then \{(-1)^n\} has a convergent subsequence. p 	o q \neg p: \{(-1)^n\} is not convergent. \neg q: \{(-1)^n\} does not have a convergent subsequence. \neg q invalid The truth of \neg p and p 	o q does not imply that of \neg q
```

QUESTION: Given the premises P_1, \dots, P_n , show a conclusion Q, that is, show that $P_1 \wedge \dots \wedge P_n \Rightarrow Q$.

Name	Operations	
Premise	Introduce the given formulas P_1, \dots, P_n in the	
	process of constructing proofs.	
Conclusion	Quote the <u>intermediate formula</u> that have	
	been deducted.	
Rule of replacement	t Replace a formula with a <u>logically</u>	
	<u>equivalent</u> formula.	
Rules of Inference	Deduct a new formula with a <u>tautological</u>	
	implication.	
Rule of substitution	Deduct a formula from a <u>tautology</u> .	

Review: Tautological Implications

Name	Tautological Implication	NO.
Conjunction(合取)	$(P) \land (Q) \Rightarrow P \land Q$	1
Simplification(化简)	$P \wedge Q \Rightarrow P$	2

Modus ponens(假言推理)	$P \wedge (P \rightarrow Q) \Rightarrow Q$	4
Modus tollens(拒取)	$\neg Q \land (P \to Q) \Rightarrow \neg P$	5
Disjunctive syllogism(析取三段论)	$\neg P \land (P \lor Q) \Rightarrow Q$	6
Hypothetical syllogism(假言三段论)	$(P \to Q) \land (Q \to R) \Rightarrow (P \to R)$	7
Resolution (归结)	$(P \lor Q) \land (\neg P \lor R) \Rightarrow Q \lor R$	8

EXAMPLE: Show that the premises 1, 2, 3, and 4 lead to conclusion 5.

- 1. "It is not sunny this afternoon and it is colder than yesterday,"
- 2. "We will go swimming only if it is sunny,"
- "If we do not go swimming, then we will take a canoe trip,"
- 4. "If we take a canoe trip, then we will be home by sunset"
- 5. "We will be home by sunset."

Translating the premises and the conclusion into formulas. Let

- p: "It is sunny this afternoon"
- q: "It is colder than yesterday"
- r: "We will go swimming"
- s: "We will take a canoe trip"
- t: "We will be home by sunset"
 - The premises are $\neg p \land q, r \rightarrow p, \neg r \rightarrow s$, and $s \rightarrow t$.
 - The conclusion is *t*.
- Question: $?(\neg p \land q) \land (r \rightarrow p) \land (\neg r \rightarrow s) \land (s \rightarrow t) \Rightarrow t$
 - Can be proven with truth table. 32 rows!

EXAMPLE: Show that the premises 1, 2, 3, and 4 lead to conclusion 5.

- 1. "It is not sunny this afternoon and it is colder than yesterday,"
- 2. "We will go swimming only if it is sunny,"
- 3. "If we do not go swimming, then we will take a canoe trip,"
- 4. "If we take a canoe trip, then we will be home by sunset"
- 5. "We will be home by sunset."
- Show that $(\neg p \land q) \land (r \rightarrow p) \land (\neg r \rightarrow s) \land (s \rightarrow t) \Rightarrow t$
 - (1) $\neg p \land q$ Premise
 - (2) $\neg p$ Simplification using (1)
 - (3) $r \to p$ Premise
 - (4) $\neg r$ Modus tollens using (2) and (3)
 - (5) $\neg r \rightarrow s$ Premise
 - (6) s Modus ponens using (4) and (5)
 - (7) $s \to t$ Premise
 - (8) t Modus ponens using (6) and (7)

EXAMPLE: Show that $(P \lor Q) \land (P \to R) \land (Q \to S) \Rightarrow S \lor R$

(1)	$P \vee Q$	Premise
-----	------------	---------

(2)
$$\neg P \rightarrow Q$$
 Rule of replacement applied to (1)

(3)
$$Q \rightarrow S$$
 Premise

(4)
$$\neg P \rightarrow S$$
 Hypothetical syllogism applied to (2) and (3)

(5)
$$\neg S \rightarrow P$$
 Rule of replacement applied to (4)

(6)
$$P \rightarrow R$$
 Premise

(7)
$$\neg S \rightarrow R$$
 Hypothetical syllogism applied to (5) and (6)

(8)
$$S \vee R$$
 Rule of replacement applied to (7)
